Date 3rd February 2015

Dear Rob and Colleagues,

As a purpose built Eco School sustainability is an important issue to us. Inviting visitors into school who help to reinforce important messages about recycling resources and conserving our environment for future generations is an immensely important part of our work.

Very often in school we teach sustainable concepts but from a theoretical viewpoint. The work you covered with the children presented them with a real life example of recycling, this gives children a relevance to the task at hand and totally engages them in their learning. Importantly, they also had a lot of fun!

Keep up the excellent work you do, it is extremely important. As a result of the work you covered with Year 4 they are more environmentally aware and can appreciate how to protect our precious resources. Hope to see you again in the future so other classes can benefit from your skill and expertise.

Kind regards

Jon Murphy
